To whom it may concern:

Vodafone Information Systems (VIS) and atsec are working together since the start of atsec. With their support we improved security within VIS considerably, which is a prerequisite for the success of an international IT service provider. Together we achieved the first BS7799 certification ever in Germany for VIS with the British Standards Institution - BSI and also introduced a best in class security monitoring system.

All this would not have been possible without the expertise, dedication and excellence of the atsec staff. All the atsec employees I dealt with are real professional security experts and a pleasure to work with.

I'm looking forward to an ongoing close collaboration.

Vodafone Information Systems GmbH

Dieter Grzeca
Head of Data Center Services
